Technology

Find below both the personal technology skills and technology specifications required for being successful in the OnlineHS program.

As a "choice program" it's important to understand that online learning is not for everyone. We work hard to accommodate the needs of students. However, it is often too difficult to learn the subject matter, concepts, and skills of a new class, while also trying to learn how to use the required technology.

Please review the list prior to enrolling in OnlineHS.

TECHNOLOGY SKILLS

Students should be able to:

- Comfortably use a computer
- Locate, access, save, & retrieve files stored on their local machine or a cloud-based storage system.
- Be proficient at using tools generally available in a productivity suite, such as a word processor, spreadsheet, and presentation software.
- Communicate using online technology: Email & Instant Messaging
- Navigate the Internet (World Wide Web) and successfully search for information using a Search Engine or Directory
